MARK-OUT INFORMATION FORM

Please note that One Call does not cover privately owned utilities. This includes, but is not limited to; UST's and associated piping, gas and electric lines on the private property, well or city water, sprinklers and septic systems. So if you or the property owners are unsure where their buried utilities are, we can perform geophysics and/or soft dig to locate and avoid them. The costs for these services are included in the proposal.

1. What is the **address of the property** that we will be working on? If there is any possibility we will be working on **neighboring properties**, please list them here also.
 - 1A. Please provide the lot & block numbers, tax parcel numbers or parcel numbers associated with each address.
 - 1B. If you have a purchase order or project number please supply it here.
2. Provide a **scaled site map** showing the street address and the nearest cross street for each property we will be working on. Please indicate whether the property is a residence, commercial property, vacant area, parking lot, etc. If a commercial property, please indicate the current or former name of the facility.

Please email a scaled site map to carol@epi-team.com
3. **Has Soft Dig, GPR or any other form of subsurface utility locating been done for this site?**
If yes, please indicate which method and provide any information that will help us to better understand the location of buried utilities.
4. Do you have any information from the homeowner/facility manager, such as **blue prints or "as-builts"** that would aid in locating buried utilities? If yes, please provide.
5. Is there any possibility that we will be **working in the street or sidewalk/right of way?** If yes, please show these locations on the site map.
6. Is there any possibility that we will be **working inside of any buildings?** If yes, please show these locations on the site map.
7. Are there any **easements** on the property we will be working on? If yes, please describe here or indicate on the site map.
